

Enhanced Proxy Detection (EPD) powered by GeoGuard

Protect Your Premium Game Rights From Geo-Piracy

The only VPN and proxy detection solution with 99.6% accuracy

Combat geo-fraud without impacting legitimate players

Stop revenue leakage

Ensure player compliance to TOS by blocking attempts to spoof location and access goods/services for lowered prices in different regions.

Increase game performance

Protect the game experience by restricting beta games and soft releases to permitted regions.

Improve system and player security

Block players in high-risk regions, protect vulnerable users, and ensure fair game-play.

A multi-layered fraud protection solution against VPNs, proxies, peer-to-peer networks and other types of data manipulation.

99.6%

success rate for VPN detection

10 billion+

requests per month

340%

increase in gaming cyberattacks during pandemic*

Fraudulent IP address database

Provides a dynamic, continuously updated list of IP addresses identified as fraudulent.

Real-time rules engine

Recognizes methods of deception used to mask the true nature of fraudulent IP addresses.

Device-agnostic

A customizable, spoof-proof geolocation solution that works with a wide range of devices and user interfaces.

Advanced location spoofing

Detects advanced location spoofing techniques such as proxy over VPN and residential IP hijacking.

Predict emerging threats

Leverages GeoGuard's machine learning and human intelligence, to predict and counter emerging threats.

Easy to implement

GeoGuard is available as a locally hosted database, a cloud-hosted solution or via an API.

Seamlessly integrated with leading CDNs

GeoGuard is seamlessly integrated with leading content delivery networks (CDNs) including Akamai and Amazon CloudFront, enabling you to simply "turn on" VPN and proxy detection.

Leading organizations trust GeoGuard to stop location fraud.
